Autobiography/Americana

CROSS CREEK

Originally published in 1942, *Cross Creek* has become a classic in modern American literature. For the millions of readers raised on *The Yearling*, here is the story of Marjorie Kinnan Rawlings's experiences in the remote Florida hamlet of Cross Creek, where she lived for thirteen years. From the daily labors of managing a seventy-two-acre orange grove to bouts with runaway pigs and a succession of unruly farmhands, Rawlings describes her life at the Creek with humor and spirit. Her tireless determination to overcome the challenges of her adopted home in the Florida backcountry, her deep-rooted love of the earth, and her genius for character and description result in a most delightful and heartwarming memoir.

"The novelist's awareness has touched people and place and incident, and the result is beauty and laughter and poignancy and truth." —*The New York Times Book Review*

"It is hard to see how anyone can read *Cross Creek* without pleasure amounting to glee." —*The Atlantic Monthly*

Acclaimed author of the Pulitzer Prize–winning novel *The Yearling*, Marjorie Kinnan Rawlings graduated from the University of Wisconsin in 1918. She was born in Washington, D.C., and moved to Cross Creek, Florida at the age of thirty-two. Some of her other books include *South Moon Under*, *Golden Apples*, *When the Whippoorwill*, and *Cross Creek Cookery*. Rawlings published fiction until her death in 1953.

So what's Z39.50?

(The really simple definition)

- It's a thingy that lets you download catalog records.
- Supported by both Koha and MarcEdit
- Find a Z39.50 server, add its configuration information to MarcEdit/Koha, and you're on your way.
- Put in information, get a catalog record back.
- Sometimes.
- This presentation uses only ISBNs; Z39.50 supports other fields as well.

Stage MARC records for import

- Select a MARC file to stage in the import reservoir. It will be parsed, and each valid record staged for later import into the catalog.
- You can enter a name for this import. It may be useful, when creating a record, to remember where the suggested MARC data comes from!

Stage records into the reservoir

So, does it work?

- Sort of
- If you have lots of time
- And no money
- Need to find records not found—different Z39.50 servers? Try by Name?
- And you have to barcode everything
- Records really need a 952 field
- Though there are ways around that

That’s all, folks!

fred.king@medstar.net
